PROJECT IDEA

CONCEPT

- TRANSFORMS AUDIO INTO GENERATIVE VISUALS USING TOUCHDESIGNER.
- INSPIRED BY CYBERPUNK AESTHETICS AND METALLIC SURFACES
- EVOLVES DYNAMICALLY WITH THE MUSIC, CREATING A REFLECTIVE ENVIRONMENT.

INSPIRATION

- PUSH VISUAL BOUNDARIES AND EXPLORE INTERACTIVITY VIA COLOR AND MOTION.
- STUDYING HOW DIGITAL ARTISTS USE CODE TO MANIPULATE PATTERNS DYNAMICALLY.

CASEY REAS

CASEY REAS, CO-CREATOR OF PROCESSING, EXPLORES THE RELATIONSHIP BETWEEN ALGORITHMS AND ARTISTIC EXPRESSION, USING STRUCTURED RANDOMNESS TO BALANCE ORDER AND CHAOS IN GENERATIVE ART. HIS WORK, INCLUDING PROCESS 19, UTILIZES NOISE FUNCTIONS, FEEDBACK LOOPS, AND PROCEDURAL TRANSFORMATIONS TO CREATE DYNAMIC COMPOSITIONS WHERE LAYERED COMPLEXITY EMERGES FROM SIMPLE RULES.

IMMERSIVE AUDIO-REACTIVE VISUALS

SAKRMUSIC ON
TIKTOK

KLSR.AV ON
TIKTOK

THEIR WORK SPARKED MY PASSION FOR TOUCHDESIGNER AS A POWERFUL TOOL FOR GENERATIVE VISUALS, INSPIRING ME TO CREATE A HIGHLY IMMERSIVE AUDIO-REACTIVE EXPERIENCE. I AM CONSIDERING INTEGRATING POINT CLOUD ANIMATIONS TO ENHANCE DEPTH AND INTERACTIVITY IN MY FINAL PROJECT.

SOME NICE THINGS TO
INSPIRE CREATIVES.

MY PROJECT GOALS

IMMERSIVE EXPERIENCE

CREATE A FULLY IMMERSIVE GENERATIVE ART THAT REACTS DYNAMICALLY TO AUDIO INPUT.

INTERACTIVITY

INCORPORATE REAL-TIME USER INTERACTION USING TOOLS LIKE MOTION TRACKING

INNOVATION

EXPLORE NEW TECHNIQUES, INCLUDING POINT CLOUD ANIMATIONS AND STRUCTURED RANDOMNESS, TO PUSH CREATIVE BOUNDARIES

KEY CODE HIGHLIGHTS

CHOP NETWORK:

CAPTURES BASS/MID/HIGH FREQUENCY RANGES AND MAPS THEM TO DIFFERENT DISTORTIONS

TOP NETWORK:

NOISE + BLUR + MIRROR CREATE THE SHIFTING METALLIC TEXTURE
REAL-TIME TRANSFORMATIONS & DISPLACEMENT DRIVEN BY AUDIO

UI CONTROLS:

USER CAN TOGGLE BETWEEN COLOR MODES AND CONTROL BLEND AMOUNT VIA ON-SCREEN SLIDERS

OPTIMIZATION:

CLEAN LABELING AND GROUPING OF OPERATORS
